

Stress-Free Water Heater Support Delivered by Trained Professionals

Reasons to choose an State ProLine® Commercial-Grade Water Heater from a Professional Installer

For nearly 80 years, State has been an innovative leader in manufacturing. Our ProLine® family of commercial-grade residential products continues that legacy. As an industry leader in commercial water heating, State understands the importance of abundant and reliable hot water in hospitals, hotels and restaurants and requires the same level of durability and performance in our residential products. We ensure that quality is built into our products by manufacturing our components in house and running each product through rigorous quality and endurance testing.

There's nothing standard about State commercial grade.

Your water heater is an investment in your home's value and your family's comfort. Enjoy speed, ease, and trouble-free professional installation when you choose a State ProLine® commercial-grade water heater.

1. Quick Help, One Call Away

Get back into hot water quickly when you work with a professional contractor for a turnkey shopping and installation experience.

2. Professionally Trained in Water Heating Service & Installation

Certified professional plumbers are not only experts in water heater installation and service, but they're also trained on local water heater codes and safe installation practices to guarantee your family's comfort and safety.

3. Long-Lasting, Commercial-Grade Water Heaters & Parts

State's ProLine® water heaters are commercial-grade products only available to professional contractors. Your contractor has access to exclusive State product training and support as well as 8-, 10-, and 12-year warranty upgrades for added peace of mind.

4. Water Heater Sizing Expertise

With hundreds of products to choose from, your contractor is an expert in choosing the right technology, capacity, and installation to meet the way your family lives and uses hot water.

5. Effortless Water Heater Delivery & Haul Away

Professional contractors will drain and haul away the old unit and facilitate the delivery and installation of your new water heater.

6. Pros Stand Behind Their Work

Just as State stands behind their product, the professional contractor stands behind their work. Your satisfaction is essential to a professional contractor.
