

ENERGY STAR® QUALIFIED GAS WATER HEATERS

According to ENERGY STAR® estimates, the average home spends about \$1,900 annually on energy bills. Higher efficiency water heaters can help.

If you're replacing an existing water heater or planning the installation of a new water heater, selecting an ENERGY STAR® qualified product can save money.

We are proud to introduce State's first ENERGY STAR® qualified gas water heaters. State gas water heaters are built with an enhanced combustion system and all of the components that make them one of the toughest you can buy. State residential tank-type water heaters are equipped with Flammable Vapor Ignition Resistant (FVIR) technology and offer flexible venting options, ensuring end users a package of efficiency and durability.
