## **State Expands Ultra Force Commercial Product Line**

*Ultra Force 300 and 400 Models are the Most Efficient State Water Heaters*

**Ashland City, Tenn. (October 11, 2006)** – State Industries, Inc., has expanded the State Ultra Force line of high-efficiency water heaters to include the new SUF130 300NEA and SUF130 400NEA. The new Ultra Force models offer 96 percent thermal efficiency for large commercial applications.

The new larger Ultra Force water heaters have 130-gallon storage capability and 300,000 or 399,000 BTU inputs. The models are available in both natural and LP gas.

Similar to the smaller Ultra Force models, the 300 and 400 models feature an advanced burner system that provides dependable and efficient operation, superior glass lining that leads to a long tank life, and a spiral heat exchanger for long-lasting performance and superior heat transfer.

The Ultra Force can also be vented as a sealed direct vent or conventional system with the option of vertical or sidewall venting.

Both models meet low NOx requirements and feature ASME construction.

-more-

The Ultra Force line now contains models that range from 60 gallons (120,000 BTU) up to 130 gallons (400,000 BTU). This full line of water heaters provides more options to solve commercial water heating needs.

### **About State Water Heaters**

For more than 60 years, State Water Heaters has built dependable, long-lasting water heaters for commercial and residential applications. State remains fixed on manufacturing durable products that last longer. For more information, visit [www.statewaterheaters.com](http://www.statewaterheaters.com).
