## **State Premier® Power Vents Supply Hot Water to HGTV “Dream House”**

*High-Efficiency Water Heaters Provide Solution for Family Needs*

**Ashland City, Tenn. (September 19, 2007)** – State Water Heaters’ Premier® Power Vent units were recently chosen to meet the hot water needs of a home that will be featured on the Home & Garden Television show “Dream House.”

The upcoming “Dream House” series features the homebuilding experience of Carmin Coutee and her family through nine weekly episodes beginning Sept. 23, 2007 at 10:00 p.m (CDT). The show focuses on building a luxurious yet energy-efficient home in Wheaton, Ill., complete with high-efficiency water heaters.

Coutee incorporated five full bathrooms and a body spray system in the master bathroom of the 5,100-square-foot home, requiring a considerable amount of hot water to support the family’s needs. The low winter incoming water temperature near Chicago was also a factor in the water heating system design.

With a recommendation from employees at State Water Heaters, Coutee chose two State Premier® Power Vent units to provide the home with plenty of hot water, including the nearly 18 gallons per minute of water flow needed for the body spray system. The Premier® Power Vent was also a good choice because the design makes installation easy by venting with inexpensive PVC and using standard ½” gas line.

# NEWS RELEASE

The Premier® Power Vent is a gas residential water heater that is 90 percent thermally efficient and features a 127-gallon first hour delivery and a 92-gallon recovery. Powered by 76,000 BTUs, the Premier® Power-Vent delivers greater hot water output than traditional units, even as large as 75 gallons and does it in a smaller footprint.

The State Premier® Power-Vent units exceed the hot water needs of the Coutee family. Coutee said, “With a family of six, our demand for hot water is tremendous. Also, everyone uses the master shower body spray system, and I was concerned that we would run out of hot water before the first shower was completed. That’s when I discovered the Premier® Power Vent. The efficiency and performance of these units beat both traditional and tankless systems hands down. We never run out of hot water.”

## **About State Water Heaters**

For more than 60 years, State Water Heaters has built dependable, long-lasting water heaters for commercial and residential applications. State remains focused on manufacturing durable products that last longer. For more information, visit [www.statewaterheaters.com](http://www.statewaterheaters.com).
