

THERE'S NOTHING STANDARD ABOUT PROLINE® MASTER

We believe that your customer's water heater should overperform no matter where it's installed. That's why, when it comes to providing durable and reliable hot water, the State ProLine® family of products removes the line between what goes in a commercial water heater and a residential unit. Our contractor-exclusive ProLine® Master 8-year products do just that by using many of the same components as our industry-leading commercial heaters.
