

TOUGHER COMPONENTS. LONGER PERFORMANCE.

Blue Diamond® Glass Coating

Stainless Steel Core Anode Rods

DynaClean™ Automatic
Sediment Cleaning System

Longer-Lasting Stainless
Steel Elements

THERE'S NOTHING STANDARD ABOUT OUR COMMERCIAL GRADE PROLINE®.

When it comes to providing durable and reliable hot water, the State ProLine family of products removes the line between what goes in a commercial water heater and a residential unit. We understand the importance of abundant and reliable hot water delivery in hospitals, hotels and restaurants and require the same standard of durability and performance in our ProLine residential products by using many of the same components as our industry-leading commercial heaters.
