

# Commercial Gas iCOMM™ Connectivity

## iCOMM CONNECTIVITY

The iCOMM connectivity service allows users to view and manage their water heater operation remotely. Detailed information on current status, usage history, set points and other key parameters is available within the app. Fault and alert information is communicated via text message and or e-mail providing valuable information needed to restore the unit to proper operation.

iCOMM now can be maintained and managed from the convenience of the State Water Heaters app. Get real time information delivered to your phone directly from your water heater. There are no subscription or app fees related to the iCOMM connectivity service making it a key feature of the Ultra Force water heater offering.

### iCOMM SYSTEM REQUIREMENTS

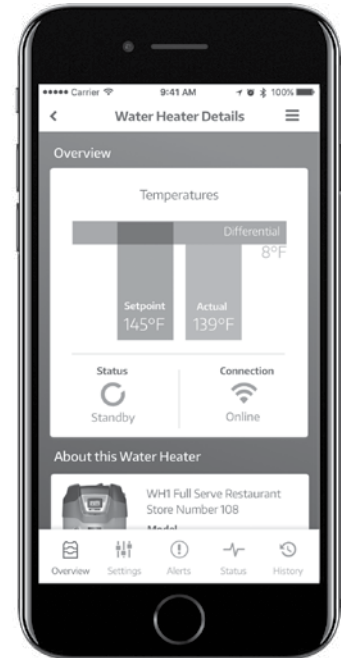

- Compatible with Modulating Ultra Force® SUF120-500 models with touch display (March 2018 production to present)
- The latest revision of the State Water Heaters app (available iOS and Android).
- Access to the buildings internet via Wi-Fi or Ethernet connection

### iCOMM BENEFITS

- Remote control and convenience
- Piece of mind monitoring and notifications
- Water heater fleet management

### iCOMM FEATURES

- Automated service notifications in the event of any of thirty-six alarm or fault conditions. Registered users are notified by text message and or e-mail.
- Appliance run time shows the total on time, cycle count and burner on time.
- Custom notification settings allow for alerts when tank temperatures are above or below user parameters.
- Users can view one or multiple water heaters assigned to their log-in.
